OPTIMUM™ SMARTPEN™
BATTERY KIT

OPTIMUM™ SMARTPEN™ BATTERY KIT

Now comes the ultimate pen battery for the ultimate pre-filled cartridge. Advanced micro-processor technology ensures you can dial in the hit you are looking for everytime! Three voltage settings provide the 'Optimum' experience, regardless of viscosity or temperature conditions. And the SmartPen™ features a preheat setting that will prep your oil for the ultimate hit – even on the coldest days of winter.

SETUP:

Screw your Optimum cartridge to the SmartPen™ just until the threads meet. **Five rapid clicks** of the button turns the unit On/Off (turning the unit off prevents accidental discharge when in your purse, pocket, etc.)

TO USE:

It's easy to cycle through the variable settings to find your preferred voltage – just click the button **three times** to reach each setting:

2.6 V Green – Good to go (recommended setting for our Flavored cartridges)

3.3 V Blue – High in the clouds (produces more vapor at a little higher temp – recommended for our Pure cartridges)

4.0 V Red – Red devil – for seasoned smokers, produces the ultimate cloud (oil will burn at a higher rate)

PRE-HEAT MODE:

To activate the pre-heat setting, click the button **two times** (oil will begin to heat at low temperature for 15 seconds at 1.8 V)
- Light on button will begin to cycle in multi-colors.
- Click button **one time** or inhale to stop pre-heat mode.

CHARGING:

- To charge your SmartPen™, just attach it to the included USB charger.
- After attaching to power source, light on the charger will display:
Red – battery requires charging
Green – battery is fully charged

CARE:

- Use a cotton swab dipped in grain or isopropyl alcohol to quickly remove any build-up or residue.
- When storing, it is recommended to keep your cartridge and pen upright.
- Avoid storing in extreme temps.

LIFETIME WARRANTY

All Optimum™ batteries are covered by a lifetime warranty. Return item to place of purchase for replacement. All returns must have original packaging and receipt of purchase.

*These instructions are intended for use with Optimum™ cartridges, and Optimum™ is not responsible for damage incurred with improper use of other brand cartridges.
